

Since 2019, I have built and managed web projects from gathering needs to support after launch. My agency and freelance experience covers project scope, cost estimates, planning and client communication. My full-stack background helps me connect business needs, user needs and technical constraints.

manongomezmor.fr

Freelance Full-stack Developer

34+ projects completed

February 2022 - Present

- Clarify client requests and turn goals, user needs and constraints into functional and technical solutions.
- Define project scope: review existing systems, advise clients, estimate work and costs, and prepare proposals.
- Plan stages, organise priorities and hold progress meetings to present work, gather feedback and adjust solutions.
- Build websites, platforms and online stores; carry out acceptance testing, fix issues and deploy solutions.
- Help clients use their tools through training, maintenance and follow-up on requests for changes.

Instructor - IT-Akademiy

17+ sessions taught

255+ students supported

January 2023 - April 2026

- Taught requirements analysis, specification writing and cost estimation to higher education students.
- Designed and taught web development and UX courses, with practical work suited to different skill levels.
- Explained technical concepts, helped students solve problems and shared good quality practices.

Mentor - OpenClassrooms

30+ students supported

October 2022 - December 2024

- Tracked WordPress development and web integration student projects: work planning, next steps and learning goals.
- Adapted support and feedback to each student's difficulties to help them build skills and work independently.

Front-end Developer - CISS

May 2022 - November 2022

- Analysed and handled maintenance tickets for Vue.js / Laravel payment solutions; tracked ticket status using Kanban.
- Helped design interfaces in Figma and took part in code reviews within the team.

Symfony / Sylius Developer - Synolia

September 2021 - March 2022

- Analysed e-commerce ticket requirements, estimated tasks and tracked progress in Jira.
- Developed with Symfony / Sylius following backlog priorities; took part in sprint planning and retrospectives.

Web Developer - Cyloé

August 2019 - September 2021

- Managed several client projects independently: requirements, work planning, priorities and deadlines.
- Built websites and online stores, managed hosting, carried out acceptance testing and deployed solutions.
- Trained clients, handled changes and maintenance, and improved SEO, performance and user experience.

EDUCATION

Mastère 1 - Full-stack Application Development

IT-AKADEMY / 2019 - 2021 • French RNCP level 6 • Apprenticeship

- Project management: gathering needs, writing specifications, estimating costs, planning and coordination.
- Methods and tools: software quality, DevOps, AWS cloud, UX design, SEO and e-commerce.
- Web development and OOP: PHP, JavaScript, Node.js, Python, Java, APIs, frameworks and design patterns.
- Database design, management and optimisation; software architecture, security and performance.

Web Development

OPENCLASSROOMS / 2018 - 2019 • French RNCP level 5 qualification

- Responsive website development with HTML5/CSS3.
- SEO, performance and compatibility across screen sizes.
- Dynamic JavaScript features and API integration.
- Object-oriented programming, error handling and good development practices.
- Database design and management.
