

Full-stack developer since 2019, building and maintaining websites, web platforms and online stores. I have worked independently on client projects and in teams on payment solutions and Symfony / Sylius applications. I bring experience in requirements analysis, problem solving and technical support.

#### Freelance Full-stack Developer

34+ projects completed

February 2022 - Present

- Build custom websites, platforms and online stores: front-end, back-end and third-party service integration.
- Analyse client needs and review existing systems to propose solutions suited to their users and constraints.
- Maintain applications: investigate incidents, fix bugs and improve performance and user experience.
- Tools and technologies: PHP, JavaScript, React, Next.js, Laravel, Tailwind CSS, WordPress, WooCommerce, Shopify and MySQL.
- Carry out acceptance testing and deployment; train clients and provide technical support.

#### Instructor - IT-Akademy

17+ sessions taught

255+ students supported

January 2023 - April 2026

- Taught HTML/CSS, JavaScript, procedural and object-oriented PHP, WordPress and WooCommerce to higher education students.
- Designed practical exercises and helped students solve technical problems, adapting teaching to their skill levels.
- Shared good practices in code quality, accessibility and UX, along with specification writing.

#### Mentor - OpenClassrooms

30+ students supported

October 2022 - December 2024

- Helped WordPress development and web integration students analyse project difficulties and find solutions.
- Reviewed their work and shared good practices in development, quality and work planning.

#### Front-end Developer - CISS

May 2022 - November 2022

- Developed features and fixes in Vue.js and Laravel as part of payment solution maintenance.
- Analysed and tracked tickets using Kanban; designed interfaces in Figma and worked with Git, SVN and code reviews.

#### Symfony / Sylius Developer - Synolia

September 2021 - March 2022

- Maintained and improved several e-commerce projects using Symfony / Sylius, PHP and Twig, following specifications.
- Analysed and estimated tickets; worked in Scrum with Jira, Git and code reviews.

#### Web Developer - Cyloé

August 2019 - September 2021

- Built websites and online stores with WordPress, WooCommerce, Shopify, WiziShop, Joomla and PHP.
- Managed hosting, configuration and deployment; carried out acceptance testing, fixes and feature updates.
- Improved SEO, performance and layouts across screen sizes; trained clients and solved technical incidents.

### EDUCATION

#### Mastère 1 - Full-stack Application Development

IT-AKADEMY / 2019 - 2021 • French RNCP level 6 • Apprenticeship

- Web development and OOP: PHP, JavaScript, Node.js, Python, Java, APIs, frameworks and design patterns.
- Database design, management and optimisation; software architecture, security and performance.
- Methods and tools: software quality, DevOps, AWS cloud, UX design, SEO and e-commerce.
- Project management: gathering needs, writing specifications, estimating costs, planning and coordination.

#### Web Development

OPENCLASSROOMS / 2018 - 2019 • French RNCP level 5 qualification

- Responsive website development with HTML5/CSS3.
- Dynamic JavaScript features and API integration.
- Object-oriented programming, error handling and good development practices.
- Database design and management.
- SEO, performance and compatibility across screen sizes.
